

Nucor Features & Benefits

Optional Base Channel w/Trim

Features

1. Base trim comes in the color of the wall.
2. The two piece design allows for field adjustment.
3. The concrete details require minimum forming.
4. Channel added for liner panel.

Benefits

1. Base trim matches the wall color. There is no decision to make concerning color.
2. Sometimes the concrete is not exactly level. A competent erector can adjust for uneven concrete.
3. Concrete notches require more material and labor to form in the field.
4. Consider adding channel for future use.

What You Should Know

1. There is no base inside closure unless you specify one in box 28. The closure is really not necessary.
2. The base channel must be anchored to the concrete. This fastener is not by Nucor.
3. Channel works well with masonry walls for flashing purposes. It does not replace a spandrel.
