

February 22, 2019

In a continuing effort to serve our customers, D.I. Roof Seamers has announced the availability of a free D.I. Roof Seamers App available for download on any Android or Apple device.

The App offers a “Request Support” option where trained D.I. Technical Support Representatives address your installation issues efficiently. There you can upload and send photos to the Technician to help identify your issue. Navigating to the “Chat” area opens up a live chat directly with one of D.I.’s Technical Support Representatives.

The App also allows the user to easily process a rental order request for seamers and/or hand crimpers from their device by accessing the “Seamer Rental” option. The helpful “Troubleshooting” area provides a collection of potential roof issues with explanations and assistance. Instructional videos for a variety of operations including initial hand crimping, proper seamer engagement, and many others are located under “Videos”.

D.I. designed their Roof Seamer App to bring a wealth of information and assistance to their customers 24/7, via any Android or Apple device. It is a must-have for every Nucor Builder using D.I. Roof Seamers.

We encourage you to download the D.I. Roof Seamers App from the Google Play Store or the Apple Store today!
