

August 5, 2019

Nucor Building Systems is constantly seeking ways to improve our product offering and remain the low cost supplier for our Builders. We are pleased to announce an improvement coming soon to our VR16 II Roof System. To provide customers with a more clearly defined product sooner in the process; Nucor Building Systems is offering the VR16 II Roof System under two distinctive names to correlate with the two types of seam options available. We will now offer both **VR16 II-90** and **VR16 II-360 Roof Systems** as selection options in eQuote.

- **VR16 II-90 Roof System**
 - Provides a 90-degree horizontal leg
 - The flat panel profile with the “battened” look provides an aesthetically pleasing appearance
 - Excellent performance and weathertightness
- **VR16 II-360 Roof System**
 - Uses a full 360-degree rolled seam
 - Offers an even greater level of architectural design with uninterrupted linear roof lines to provide a sleek, modern appearance
 - A great panel for those roof systems with valleys and or hips due to the simple true vertical rib
 - Exceptional performance and weathertightness

For more information on the VR16 II-90 and VR16 II-360 Roof System, please reference the sales literature at: <http://www.nucorbuildingsystems.com/vr16II>

Critical Dates: The option to select a VR16 II-90 or VR16 II-360 Roof System in eQuote will be available on August 6, 2019. For more information, contact your local Sales Representative or Project Coordinator.

Our Commitment

Nucor Building Systems is committed to ongoing improvements in all aspects of our business. This change is intended to enhance our product offerings and improve our costs and competitiveness in the market place. Your input and comments are always appreciated. If you have specific questions regarding this bulletin or any other area of our business, please contact your District Sales Manager or Project Coordinator.
