RELIGIOUS

With over 30 years of experience, Nucor Building Systems understands the special needs and requirements of religious facilities.

Nucor Building Systems understands the diverse needs of the modern religious industry. From clear span construction to accommodate the need for large open spaces, to specially designed mezzanines for beautiful balconies, we offer a full flexible product line that is custom designed for each client. Our building systems' design advantages offer an abundance of exterior options, including canopies, fascia and parapet walls to enhance the appearance of your religious facility. Your building can also be designed with expandable endwalls to accommodate your congregation as your ministry grows.

Powerful Relationships. Powerful Results.

Nucor Building Systems is a division of Nucor Corporation, North America's most diversified steel and steel products company. Their integrated infrastructure allows us direct access to an uninterrupted supply of steel. As a result, we have the ability to provide our customers with single-source solutions for a wide range of products. Our strength, stability, capacity, resources, and customer-driven focus offer unprecedented value to our customers.

Nationwide Authorized Builder Network

With a coast-to-coast Authorized Builder network, there is likely an experienced Nucor Builder in your local area to partner with on your custom metal building solution.

Innovative, Cutting Edge Technology

As leaders in innovation, we continuously develop some of the most versatile, energy-efficient and cost-effective building solutions on the market today. We work closely with our customers to gain a deeper understanding of their building needs. As a result, we develop new solutions or improve existing ones that provide you with high-performance, competitive products.

Superior Product Systems

Nucor Building Systems has raised the metal building industry bar with our high-performance products designed to meet your unique needs. We offer a full range of metal building framing options, industry-proven roof panel systems, attractive wall panels, insulated metal panels, insulation systems, energy-saving prismatic skylights, innovative mezzanines, and multiple building accessories.

Technical 3D BIM Design Strength

Each Nucor building system is custom designed from the ground up utilizing Tekla BIM 3D software. You will have a digital prototype that incorporates all aspects of your building from framing to components such as electrical, plumbing and HVAC, which facilitates coordination and cooperation between all principal trade contractors on your project. This allows issues to be addressed early in the process, before your building is manufactured – saving you time and money, and bringing your building to life faster and more efficiently than ever before.

Metal building construction is quick and efficient when compared to conventional construction, saving time and money on the job site.

The affordability, design flexibility and energy efficiency of metal building systems make them an appealing solution for religious facilities.
