

# Hangar H

a **NUCOR** company

## LOCATION

Lake Charles, LA

## SIZE

Six buildings totaling  
129,400 sf

## WALL SYSTEM

Nucor Classic Wall™

## ROOF SYSTEM

Nucor CFR™ Standing Seam

An invaluable resource for the US Gulf Coast, Hangar H provides Maintenance, Repair and Overhaul (MRO) services for the aircraft of international companies.

Comprised of a total of six buildings, Hangar H is a high-capacity facility that features 260' x 65' Megadoor vertical lifting fabric doors with a drive-through configuration, making it easy to accommodate two massive C-5 cargo aircraft with T-tails. By using fabric lift doors, the building was able to have a "stepped" design, which allowed for a dramatic reduction of the building's eave heights - translating into a substantial cost savings.
