Marshall University's goal was to improve facilities for student athletes, allowing the university to keep up with the trends that exist within collegiate athletics across the country.

The recent completion of the 102,000 sf Chris Cline Athletic Complex realizes the University's vision and more for a state-of-the-art athletic facility.

It features a 300-meter NCAA-approved indoor track with eight-lane straightaways and six lanes in the curves around an oval 120 yard indoor football field. Bleacher seating accommodates 750 to 1,000 spectators for indoor track meets and events.

The building was designed using a Nucor pre-engineered building systems and is finished with Nucor Classic Wall™ Panel and a Nucor CFR Roof™ System.
