

# Woodward Training & Sports Facility

a **NUCOR** company

## LOCATION

Soda Springs, CA

## SIZE

33,000 sf

## WALL SYSTEM

Nucor Reverse Classic™

## ROOF SYSTEM

Nucor CFR™ Standing Seam

Perched atop the beautiful Donner Summit, Woodward Tahoe is an extreme action sport training facility and the largest of its kind in the United States. A rigid frame pre-engineered metal building system, it features the Nucor ClearBay® bolted joist system.

At 33,000 sf in size, this sports facility serves as space for training camps and special events for snowboard, ski, skate, BMX, and cheer/gymnastics with onsite lodging for campers. It features state-of-the-art training space with seven trampolines, a virtual playground of banked walls designed for ski/ride training, skateboarding, and BMX biking, a launch pad ramp with foam landing pits, a spring floor, bouldering wall, tumbling track as well as outdoor features on the mountain including a terrain park with a 22' super pipe, jumpline and multiple jibs.
