a **NUCOR** company

## LOCATION

Grandview, MO

## SIZE

88,307 sf

## WALL SYSTEM

Nucor Accent Wall™

## ROOF SYSTEM

Nucor CFR™ Standing Seam

Dayton Freight Lines, a leading provider of regional less-than-truckload (LTL) transportation services, recently relocated their Kansas City Service Center to Grandview, MO. Built in response to increased demand, the new 110-door facility is set on 34 acres and allows the company to offer faster and more consistent LTL transportation service to customers.

The new trucking terminal and maintenance shop project was designed as a conventional front office building with attached terminal building. It includes a full service maintenance building located behind the terminal building that features a partial mezzanine, a truck wash bay and a fuel bay. Prismatic skylights are used throughout the building to provide natural daylighting.
