Fillmore Equipment, a John Deere dealership is now part of GreenMark Equipment, Inc. , a newly merged agricultural farm equipment dealership with 16 locations in Southwest Michigan and Northern Indiana.

Fillmore turned to Authorized Nucor Builder, First Companies, Inc. located in Grand Rapids, Michigan, to help them meet their expansion goals. The new 41,000 sf facility allows ample room for the Fillmore technicians to service larger and more technical farm equipment. Two 5-ton overhead cranes assist the service staff with the maintenance capabilities and moving the large combines and other farm equipment.

Over 8,000 square feet of additional space for storage and offices is included in the multiple mezzanines. A conference room allows the business to host clinics for the local farmers with live video streaming capability to provide top-notch seminars featuring current and up-to-date planting and harvesting techniques. The dramatic sales showroom floor allows retail space for lawn and garden equipment and supplies.
