

The Journey Church

a **NUCOR** company

LOCATION

Fernandina, FL

SIZE

30,000 sf

WALL SYSTEM

Insulated Metal Panels

ROOF SYSTEM

Nucor CFR™ Standing Seam

The Journey Church is a new 30,000 sq ft facility comprised of a 1,000-occupant auditorium with associated church offices and support rooms, including a classroom, green room, production area, storage room, MEP rooms, and pantry/catering kitchen. Also included is an 8,200 sq ft childcare/educational wing.

The structure was designed using four custom Nucor pre-engineered buildings - two clear span, single slope buildings as well as a front and rear lean-to. The exterior is finished with insulated metal wall panels, for maximum energy efficiency, and features multiple colors with an attractive wainscot.
