Nucor Reverse Classic™

ROOF SYSTEM

Nucor CFR™ Standing Seam

The Southwest Fire Department's newest fire station is Station #4 located near Fort Wayne. The building was designed using two connected Nucor pre-engineered buildings, the garage building at 80' x 104' and office area at 60' x 60'.

The exterior of the building is finished with Nucor Reverse Classic™ Wall Panel and a Nucor CFR™ Roof System.
