| 7.3.2 |
STANDARD FASCIA INFORMATION, SPECIFICATIONS, AND DIMENSIONS

1. Fascias may be open or closed soffit with a closed with soffit being the standard condition.

2. Fascias MUST terminate at a sidewall or endwall column.

3. Fascia sheeting material, including face panel, back panel, and soffit panel is available in either Nucor Classic Wall™, Nucor Reverse Classic Wall™, Nucor Accent Wall™, when supplied by Nucor Building Systems. Fascia sheeting may also be specified as supplied by others or not by Nucor Building Systems. In these cases, the weight of the sheeting and any specified deflection criteria must be supplied to Nucor Building Systems with the quote request and order documents. Contact the engineering team for assistance.

4. Fascia standard location is at/near the Eave height of a building.

5. With a Nucor CFR™ standing seam roof, a minimum of 18” is required above the highest portion of the roof structural to the top of a closed fascia to provide space for proper flashing. With a Nucor Classic Roof™, a minimum of 10” is required for this condition.

6. The fascia clear dimension is taken from finish floor to bottom of the fascia structural.

Additional information Nucor standard fascias is available at the Nucor Building Systems website at the below link.

Standard Nucor Fascia

The following pages provide standard details for projects with fascias.

**Diagram Details**:
- **Cap Trim**: Same color as fascia panel.
- **NUCOR Accent Panel™**: Fascia panel or any material (not by NUCOR) not over 5 PSF.
- **Vertical Fascia Post**.
- **Girt Offset**.
- **Fascia Base Trim**: Same color as fascia panel.
- **Projection**:
  - A: 4'-0" & 7'-0" nominal vertical.
  - B: 1'-6" & 4'-0" nominal horizontal.
  - C: 2'-2" @ 1'-6" horizontal.
  - D: 2'-9" @ 4'-0" horizontal.
- **Gable Valve NUCOR Classic Wall™ Back Panel**.
- **Interior Gutter w/ EPDM Liner (not by NBS)**.
- **Steel Line**.
- **NUCOR CFR™ or NUCOR Classic Roof™**.
- **Eave Member**.
- **Horiz. Fascia Beam**.
- **Column**.
- **Soffit Trim**: Same color as soffit panel.
- **Soffit Panel**.

**Note**: Downspouts for fascia conditions are by NUCOR as long as NUCOR is supplying the gutter and the gutter is outside of the building line. Downspouts for interior gutter systems are not by NUCOR.

ERECTOR NOTE

PLEASE READ BEFORE ERECTING FASCIA HORIZONTAL AND VERTICAL MEMBERS.

NOTE: SPACERS ARE PROVIDED SO THAT THE WALL PANELS DO NOT HAVE TO BE NOTCHED TO FIT AROUND THE HORIZONTAL MEMBER. THIS ALLOWS THE FASCIA HORIZONTAL AND VERTICAL MEMBERS TO BE ERECTED AFTER THE WALL PANEL IS ERECTED. THIS CAN BE DONE BY CUTTING OUT THE WALL PANEL IN THE RECTANGULAR SIZE OF THE SPACER END PLATE, OR BY FLATTENING THE PANEL RIB BETWEEN THE SPACER AND THE HORIZONTAL MEMBER.

HI6060 – ENDWALL FASCIA SHEETING

See Detail A for additional important panel fastener trim installation information.

Director Note:
The back panel fastener trim is designed with a lip bend as shown to allow "Positive Drainage" onto the roof panel.

Detail Name If Applicable:
HI6060 – ENDWALL FASCIA SHEETING

See Detail B:

Outside panel closure:
- Accent panel: H3400 classic panel.
- Reverse: classic H3410.
- H1040 fasteners must penetrate the closure.

Detail C:

Soffit panel must be installed before soffit trims.

Detail D:

Soffit trim:
- Trim: H1040 12" O.C.

Insulation:
- Rwp: 2021 (total)
- Rwp: 2020 (total)
- (2) H1040 fasteners per clip.
