

CSN Flat Rolled Steel & Galvanizing

a **NUCOR** company

LOCATION

Terre Haute, IN

SIZE

1,100,000 sf

EXTERIOR

Nucor Classic Wall™ PVDF

ROOF SYSTEM

Nucor CFR™ Standing Seam

With 17 acres under roof, this massive, state-of-the-art industrial complex was built using over 6,500 tons (13 million pounds) of steel. It contains 16 crane systems that range from 15 to 80 ton capacities, with 36'x359' crane beams.

CSN, formerly Heartland Steel, is a 1-million-ton-per-year independent flat rolled steel processing and galvanizing facility.
