Provided by owner

ROOF SYSTEM

Nucor CFR™ Standing Seam

Logan Aluminum manufactures flat rolled aluminum sheet used primarily in the beverage can market. They produce two aluminum alloy sheet products for both the top with tab and the body of the can.

Logan partnered with a Nucor Building Systems Builder for this design build facility. The main building is surrounded by twelve support buildings and has a 137' clear-span with 2 bays and is 65' tall. The facility has 4 cranes ranging from 10 ton to 85 ton capacity.
