Yarde Metals is a multi-metal processing center located in central Connecticut. This manufacturing/distribution building contains multiple cranes with capacities up to 30 tons, and a crane span of 97'-7".

The exterior is a combination of concrete masonry with Nucor Reverse Classic Wall™ that includes extensive Nucor Wall Lites™ which allow natural light within the building. To increase energy conservation, this facility also features 19,500 sf of Nucor CFR™ mounted PV solar panels.
