

PRODUCT BULLETIN

July 16, 2015

Nucor Building Systems is constantly seeking ways to improve our product offering and remain the low cost supplier for our Builders. We are pleased to announce that we have updated our current insulated metal wall panel product lineup to offer, as the standard, a **Light Embossed** exterior texture, in lieu of the smooth texture, for the Double Mesa (DM40) and Striated (ST40) wall panel profiles.

The Light Embossed texture improves the visual appearance of the panel and offers enhanced strength characteristics providing an even better product for our customers. The Smooth exterior texture is still available as an option.

Important item to note: Wall and roofline *trims* will remain *Smooth* as the standard. Light Embossed trims are available upon request (May affect lead times and cost.)

Insulated Wall Panel:

Double Mesa Profile (DM40) with Light Embossed Texture

Striated Profile (ST40) with Light Embossed Texture

Critical Dates: Available to order immediately. Contact your local Sales Representative for more information.

Our Commitment

Nucor Building Systems is committed to ongoing improvements in all aspects of our business. This change is intended to enhance our product offerings and improve our costs and competitiveness in the market place. Your input and comments are always appreciated. If you have specific questions regarding this bulletin or any other area of our business, please contact your District Sales Manager or Project Coordinator.
