

PRODUCT BULLETIN

August 29, 2014

Nucor Building Systems is constantly seeking ways to expand our product offering and remain the low cost supplier for our Builders. We are pleased to announce the recent improvement of our PVDF paint system to include new component chemicals that result in a more environmentally friendly paint. This change does not affect the appearance or performance of the paint but does change the values for Initial Solar Reflectance (IR) and Initial Thermal Emittance (IE) resulting in revised Solar Reflective Index (SRI).

The table below references the new values of the PVDF paint system:

DESCRIPTION	Old IR	Old IE	Old SRI	New IR	New IE	New SRI
DARK BRONZE	0.29	0.85	29	0.31	0.87	32
CYPRESS GREEN	0.30	0.87	31	0.31	0.85	31
REGAL WHITE	0.72	0.86	87	0.72	0.85	88
ROYAL BLUE	0.29	0.85	29	0.30	0.86	31
MEDIUM GRAY	0.37	0.87	40	0.36	0.83	37
SURREY BEIGE	0.51	0.86	58	0.48	0.83	53
TERRA COTTA	0.35	0.85	36	0.35	0.84	35
WARM WHITE	0.59	0.88	70	0.62	0.84	73

Critical Dates: The revised PVDF paint system will be used effective immediately. New PVDF color charts with updated Initial Solar Reflectance, Initial Thermal Emittance, and Solar Reflective Index values are also available.

Our Commitment

Nucor Building Systems is committed to ongoing improvements in all aspects of our business. This change is intended to enhance our product offerings and improve our costs and competitiveness in the market place. Your input and comments are always appreciated. If you have specific questions regarding this bulletin or any other area of our business, please contact your District Sales Manager or Project Coordinator.
