

# PRODUCT BULLETIN

October 6, 2014

Nucor Building Systems is constantly seeking ways to expand our product offering and remain the low cost supplier for our Builders. We are pleased to announce an improvement to our Insulated Metal Panel Standing Seam Roof Panel (SR2). These panels will now be offered as standard **with factory applied sealant** on the topside rib of all SR2 panels.

This enhancement is intended to add value for our Builders by saving time in the field; however the option of declining the factory applied sealant is an available option.

We do not advise using the factory applied sealant on cold storage or food processing building applications or in extreme cold weather areas (20 degrees or below during installation). Please contact your sales representative for qualifications on these types of buildings.

**Critical Dates:** The SR2 Insulated Standing Seam Roof Panel with factory applied sealant is available immediately.

## **Our Commitment**

Nucor Building Systems is committed to ongoing improvements in all aspects of our business. This change is intended to enhance our product offerings and improve our costs and competitiveness in the market place. Your input and comments are always appreciated. If you have specific questions regarding this bulletin or any other area of our business, please contact your District Sales Manager or Project Coordinator.
