

PRODUCT BULLETIN

August 2, 2017

Nucor Building Systems is constantly seeking ways to improve our product offering and remain the low cost supplier for our Builders. We are pleased to announce an improvement to our primer paint system, moving from a solvent-based shop coat primer to a new **water-based shop coat primer**.

The new water-based shop coat primer is an acrylic paint, rather than alkyd, that will provide an overall better quality coating that also creates a better barrier seal to more effectively keep water out and prevent rust from penetrating the surface. In addition, the water-based primer is more environmentally friendly and a safer product to use in the field when applying touchups.

Critical Dates: The transition to the new water-based shop coat primer will begin in mid-August. For more information contact your local Sales Representative or visit www.nucorbuildingsystems.com/.

Our Commitment

Nucor Building Systems is committed to ongoing improvements in all aspects of our business. This change is intended to enhance our product offerings and improve our costs and competitiveness in the market place. Your input and comments are always appreciated. If you have specific questions regarding this bulletin or any other area of our business, please contact your District Sales Manager or Project Coordinator.
