

CompuTech City, LLC Office Building

a **NUCOR** company

LOCATION

Longwood, FL

SIZE

10,000 sf

WALL SYSTEM

Nucor Classic Wall™

ROOF SYSTEM

Nucor CFR™ Standing Seam

CompuTech City LLC, a firm providing IT services and solutions for more than 600 medical industry clients, utilized a Nucor pre-engineered metal building for their new headquarters based in Longwood, Florida. This project was completed by Authorized Nucor Builder, Evergreen Construction.

The project consists of two single slope clearspan buildings encompassing the modern open-concept office space and warehouse. Each building features a lean-to with exposed columns and solar panel canopies, which provide for shade and abundant natural energy. The buildings are clad in Nucor Classic Wall™ panel in burnished slate, while the roof utilizes 24-gauge Nucor CFR™ Standing Seam panels in Galvalume.

Metal Architecture announced that CompuTech's new headquarters had won the 2018 Design Award for the Metal Buildings category, and featured the project in their July 2018 issue.
