

Elliott Centennial Office Headquarters

a **NUCOR** company

LOCATION

Jeannette, PA

SIZE

113,000 sf

WALL SYSTEM

Nucor Reverse Classic Wall™

ROOF SYSTEM

Nucor CFR™ Standing Seam

This contemporary new office building serves as corporate headquarters for the Elliott Group, a leading manufacturer of turbo-machinery used by petrochemical, refining, oil & gas and process industries.

At 113,000 sf, the two-story facility is home to administration, engineering, and customer service functions previously spread out across multiple buildings. Anything but old-fashioned, the headquarters is dubbed the Centennial Building to commemorate the company's 100th anniversary. The bright, airy space features a mix of open workstations, collaborative gathering space and large meeting rooms centered around the dining commons.

The facility is made up of a rigid frame pre-engineered metal building system with a Nucor CFR™ Standing Seam Roof System.
