

Temple University Student Health & Wellness Center

a **NUCOR** company

LOCATION

Philadelphia, PA

SIZE

60,200 sf

WALL SYSTEM

Insulated Metal Wall Panel

ROOF SYSTEM

Nucor CFR™ Standing Seam

The Temple University Student Health and Wellness Center is an academic, athletics and recreation facility that provides enhanced space for students in the College of Public Health to hone their clinical skills along with space for students to play recreational sports and weight train. The 60,200 sf pre-engineered structure houses an indoor football field for practices.

The building was designed using a custom Nucor building with a Nucor CFR™ Standing Seam roof system.
