a **NUCOR** company

## LOCATION

Heber City, Utah

## SIZE

10,400 sf

## WALL SYSTEM

Nucor Classic Wall™

## ROOF SYSTEM

Nucor Classic Roof™

## BUILDING END-USE

Micro Greens Grower

Located in Wasatch County, Utah, Strong Vertical Farms expanded their home business to 1,700 square feet and then into this 11,000 square foot indoor growing facility in 2017. Strong grows their produce indoors and hydroponically. Their warehouses only use biodegradable products and LED grow lights allowing them to be a 90% green company.

Micro-greens are grown on 7 levels with over 6 acres of plants. The facility houses a grow building, refrigerated space, a harvest pack, a grow clerestory, and an office and breakroom.
