

July 9, 2019

Nucor Building Systems is constantly seeking ways to improve our product offering and remain the low cost supplier for our Builders. We are pleased to announce an improvement coming soon to our line of secondary products.

Secondary Product Changes:

To provide customers with a more cost-effective product; Nucor Building Systems is transitioning to 9 1/2" secondary members replacing the 10" depths. Below is a brief summary of the new and improved product changes.

- **9 1/2" Secondary Members for Purlins and Girts**
 - More efficient, higher capacity 9 1/2" secondary members will replace the current 10" depths.
 - (8" and 12" depths will still be available)

For technical information on the Secondary product changes, please reference the NBG Certified Erection Details (CED) at: www.nucorbuildingsystems.com/resources/product-manual/

As this transition will take place incrementally, please continue to reference the Product Manual for legacy technical information on projects not affected by the Secondary product changes.

Critical Dates: The transition to the new secondary product changes will take place incrementally and will affect some projects designed beginning as early as July 15, 2019. For more information, contact your local Sales Representative or Project Coordinator.

Our Commitment

Nucor Building Systems is committed to ongoing improvements in all aspects of our business. This change is intended to enhance our product offerings and improve our costs and competitiveness in the market place. Your input and comments are always appreciated. If you have specific questions regarding this bulletin or any other area of our business, please contact your District Sales Manager or Project Coordinator.
