Your partners at Nucor Buildings Group work continuously to develop cutting-edge tools and programs to help our Authorized Builders grow their businesses. That is why we are proud to announce the new contract between Nucor Buildings Group and Sourcewell.

Sourcewell is a leading, independent government agency that creates cooperative contract purchasing solutions on behalf of its member agencies, which include municipalities, government, education institutions and non-profits. These contracts offer both time and money savings by consolidating the efforts of numerous individually prepared solicitations into one, cooperatively shared process—taking advantage of the volume pricing generated by over 70,000 members across North America.

Through our Sourcewell contract, NBG and our Builders now have the opportunity to supply buildings for more local government agencies without the building owner needing to go through the typical bid procurement process. This is because Sourcewell has already facilitated a competitive solicitation process for building suppliers and has satisfied the competition requirement. This streamlined process reduces the time for proposal acceptance, often taking up to nine months, to as little as six weeks.

To learn more about Sourcewell cooperative purchasing, and how NBG's contract opens up exciting new avenues of business, please register to join one of our upcoming webinars. In each session, we will explore the benefits of cooperative purchasing and provide you with a complete understanding of how to leverage this exciting new opportunity to your advantage.
