

USF Holland Truck Terminal

a **NUCOR** company

LOCATION

Wayland, Michigan

SIZE

49,875 sf

WALL SYSTEM

Nucor Reverse Classic Wall™

ROOF SYSTEM

Nucor CFR™ Standing Seam

BUILDING END-USE

Commercial Freight Terminal

Founded in 1929 in Holland, Michigan, Holland trucking recognized they needed to leave their old terminal and build a new one to meet both their present and future needs.

Located in western Michigan on 22 acres of land, this new cross dock terminal is a 70' open span 42,500 sf structure with attached 6,300 sf office. The project includes 110 truck docks and a 15,840 sf maintenance building with a fuel island and has become a standard for future construction projects.
