BUILDING END-USE

Sanctuary

Spring Creek Baptist Church is an Independent Fundamental Baptist Church located in Seven Springs, NC. This new sanctuary is a 67' x 86' clear span facility. Nucor provided support for a 34' tall steeple with a 6' base that is located center of ridge, and weighs 827 pounds. While the Nucor Classic Wall was utilized for the building, the front is clad with stucco and brick. Also aesthetically pleasing is the use of Nucor's VR16 II Vertical Rib Standing Seam roof system. This roof system is designed to provide a sleek, modern appearance, and is also created to withstand the most extreme weather conditions.
