

June 2021

Nucor Building Systems is constantly seeking ways to improve our product offering and remain the low-cost supplier for our Builders. We are pleased to announce an improvement to our standard walk door package which will now include, at no additional charge from our previous offering, a powder coated finish on its door leaf and frame. This upgrade will provide a much more durable and consistent finish and will extend the life span of your walk doors in the field.

Powder coating provides better performance than wet paint—it is more resistant to chipping, scratching, and other wear because of the thermal bonding it undergoes during curing, and because it can be applied in much thicker layers. In addition to its physical toughness, powder coating provides superior color retention.

Below is a summary of the upcoming changes:

- **Powder Coated Finish**- In order to provide a more durable and consistent finish, our standard walk door packages will now include a powder coated finish on its door leaf and frame. This upgrade will significantly extend the life span of your walk doors in the field. These powder coatings come pre-painted in White or Bronze finishes.

For more information on our door program, please reference the [sales literature](#).

Critical Dates: The new powder-coated walk doors are available immediately. For more information, contact your local Sales Representative or Project Coordinator.

Our Commitment

Nucor Building Systems is committed to ongoing improvements in all aspects of our business. This change is intended to enhance our product offerings and improve our costs and competitiveness in the marketplace. Your input and comments are always appreciated. If you have specific questions regarding this bulletin or any other area of our business, please contact your District Sales Manager or Project Coordinator.
