Fox Gray

BUILDING END-USE

Field House

This 70' x 152'-8" athletic field house for the Bryant School District's Junior High School was designed using a custom Nucor building with a clear span interior. A Nucor CFR Standing Seam Roof system was utilized. The exterior is clad with a combination of the Nucor Classic Wall, brick and glass, supported by spandrel beams. The building is accented by several below-eave canopies. The field house includes a weightroom, coaches offices, and locker rooms.
