

Fat Bottom Brewery

a **NUCOR** company

LOCATION

Nashville, TN

SIZE

33,576 sf

WALL SYSTEM

Insulated Metal Wall Panel
Pearl Gray

ROOF SYSTEM

CFR™ Standing Seam
Regal White

BUILDING END-USE

Brewery, Restaurant & Event Space

After outgrowing its original location, Fat Bottom Brewery designed a new facility with more space. The 33,576 structure was constructed using a custom Nucor pre-engineered building designed to fit their unique needs. The overall facility uses several gable buildings to house the brewery processing area, storage, tap room, front canopy, and large event space.

The exterior is finished with Insulated Metal Panel walls and a CFR™ Standing Seam roof system.
