20,000 sf

## WALL SYSTEM

R-Panel  
Charcoal

## ROOF SYSTEM

R-Panel  
Galvalume

## BUILDING END-USE

Sales Office & Warehouse

Bacon plumbing is a family-owned plumbing, HVAC, and electrical company located in Rockwall, TX. Four clear span framing structures were used to build their sales office and warehouse. The main building uses a gable symmetrical, and the entry, curved entry, and bump out buildings use single slope framing systems.

Nucor supplied tube support for all three canopies that each have a horizontal projection of 5'-6", and the columns, rafters, and bracing for the curved roof building. A trio of colors with accents of red and brick bring a modern and sleek look to the exterior. The curved roof and window front at the entrance add detail and dimension to the exterior as well.

The main and entry building are fully surrounded by parapet walls and finished with Nucor's R-Panel roof system in galvalume.
