IMP

Regal White

BUILDING END-USE

School Gymnasium

This athletic facility serves as a fieldhouse, gymnasium, and multipurpose building for Jackson Central-Merry schools. Students highly anticipated this state-of-the-art addition that was built using three single slope structures to house a gym, corridor, and lobby. The field has a 1,260-seat capacity, locker rooms, offices, and more.

The clear span structure features multiple framed openings throughout the gym for windows that provide plenty of natural light, and the interior is protected and finished with Nucor Liner Panel. Urban bronze wall panels compliment the 10'-0" brick that surrounds the building and wood accents at the front entrance. The lobby entry and corridor feature a 12'-0" open fascia with a 3'-0" horizontal projection. The building is fully surrounded by parapet walls that are sheeted to match the urban bronze IMP panels.
