a **NUCOR** company

## LOCATION

Jones, OK

## SIZE

6,000 sf

## WALL SYSTEM

R-Panel  
Warm White

## ROOF SYSTEM

R-Panel  
Slate Gray

## BUILDING END-USE

Agricultural Storage

This 6,000 sf agricultural building was custom designed by NBS, using one gable symmetrical framing system. Two 14'-0" overhead doors were installed at the front and side of the building, making it easier to store ag equipment. Both doors are insulated, and custom smart trim patterns are featured on each, adding to the aesthetic.

The clear span building has two cupolas located on the roof, custom clipped overhead door corners, and an R-Panel wainscot with a matching color break at the corner trim and downspouts. Warm white wall panels pair perfectly with the gray roof and wainscot, accentuating the clean and modern-looking exterior.
