Prosser, Washington

## SIZE

7,500 sf

## ROOF SYSTEM

R-Panel  
Regal Red

## WALL SYSTEM

R-Panel  
Regal Red

## BUILDING END-USE

Wine Processing Center

Alexandria Nicole is an award-winning wine company that prides itself on their humble beginnings and in becoming a state-of-the-art winery focused on sustainable farming.

The 7,500 sf storage building is a gable symmetrical design with clear span interior. Four high windows were added along the front sidewall and five across the back side to ensure plenty of natural lighting. Five skylights are featured on the roof.

8" concrete foundation with 2' top elevation surrounds the bottom of the building. It is finished using an R-Panel roof with 4" double layer liner banded system insulation and walls that have a 4" liner type basket insulation system as well.
