SketchUp Discount Now Available for NBS Builders

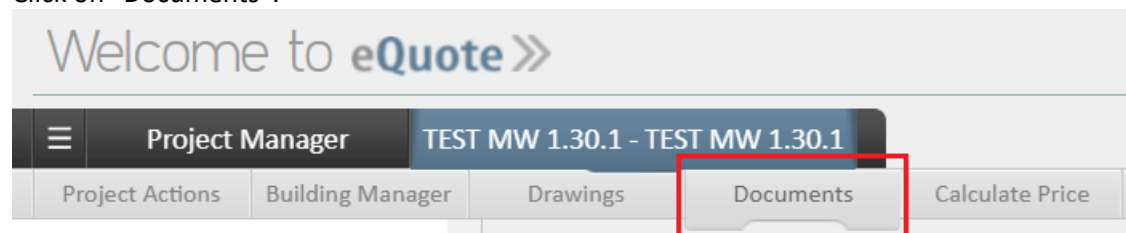

Did you know your eQuote 3D renderings can be enhanced by importing your file into SketchUp or SketchUp Pro? In SketchUp, you can enrich your building models by adding signage, landscaping, parking lots, cars and other 3D items to make your rendering as true to life as possible — and therefore, strengthening your presentation and helping you win more bids.

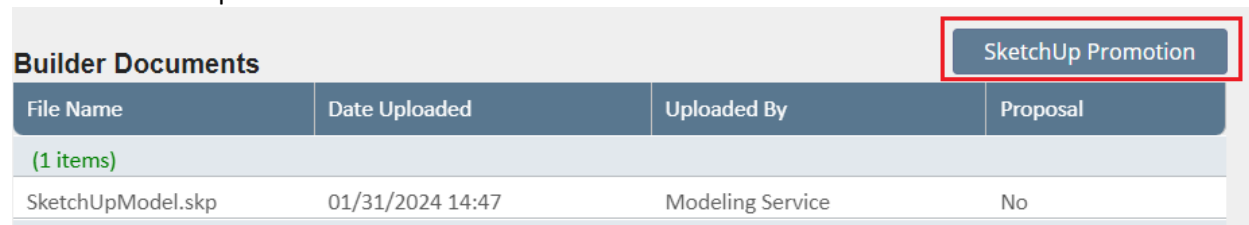

We're excited to announce a limited time discount exclusively for our Authorized Builders of 10% off a SketchUp license.

In order to receive the promotional discount, complete the form linked [here](#) and reference Nucor. This same link will be displayed in eQuote in the Documents section.
