

# PRCC Aviation Workforce Academy

a **NUCOR** company

## LOCATION

Kiln, MS

## SIZE

30,000 sf

## WALL SYSTEM

Insulated Metal Panel  
Polar White/Slate Gray

## ROOF SYSTEM

Nucor CFR  
Galvalume

## BUILDING END-USE

Aerospace/Aviation Academy

Vertical and horizontal application of Insulated Metal Panels by Metl-Span in Polar White and Slate Gray create a beautiful, modern presentation to this community college's aviation and aerospace academy. The 30,000 sf structure is complimented by Nucor's CFR roof system in Galvalume, curved parapet walls and mezzanines. A covered, open wall area is featured at the back of the building for equipment storage. Canopies provide function and accentuate the main entrance.
